WORK EXPERIENCE

Front-End Engineer

AutoRemind S/A [🔗](#)

11/2021 - Present

Copenhagen, Denmark

Is a health care industry, patient communication environment

- I improve the delivery process of new features successfully by implementing feature flag concept on front end. Reducing feature delivery time in production
- I've built a rich text editor from scratch with success. Improving the user experience and reducing the time of template emails creation. What attracted new customers.
- I was in charge of the research and development for a cross-platform app similar to WhatsApp with success. It's was built in Tauri, a cross framework and React with Next.js as web framework, that engage the communication flow between doctor and patients. What attracted new customers.
- I led the decision making process regarding tech stack to migrate an Angular app to React using Next.js as framework whit success.

Front-End Engineer

Cerved Group s.p.a [🔗](#)

05/2020 - 10/2021
